Because I healed my infections in a very unique way.

I did it with:

No expensive medication,

No nonsense anti-fungal creams,

No fake Chinese remedy,

No over-hyped vitamin therapy

and nothing that you ordinarily see out there...

What I used was not like anything else you might have seen, absolutely nothing like what you have read in the health magazines, online or might get from your local health clinic...

Now I almost didn't write this...

In this short story I share parts of my private life that frankly, I'm embarrassed about...

But I know a lot of women want to know how to stop recurring embarrassing vaginal infections and achieve better health, so I realized I was sitting on something so exciting that it's almost impossible to keep a secret and that's why I went ahead and wrote it anyway...

Chances are though, because some of what I have to share is so personal, I won't be keeping this web page online for long.

In fact, I will probably take this report down by the end of the day. So I urge you to read it word for word now let's begin.

As a young adult, I was always a perfectly healthy, clean and sexy woman. My boyfriend and I were enjoying our lives - travelling, partying, trekking and enjoying any which way we found ourselves.

Once we were enjoying our holidays in beautiful Tampa, Florida, and we have booked a fine Atlantic-ocean viewing room.

For no apparent reason, he took me to a glamorous beach restaurant. It was expensive for him (I thought) but he was so into me, the wine was great, the food was mouth-watering and the sound of the music was soothing, a cool breeze was flowing my hair... and looking out towards the ocean, I could feel... HE LOVES ME SO MUCH.

Then out of the blue, next morning I found a disgusting 'foul odor' coming out of my intimate parts.

As if I am decaying inside. It deteriorated into a very horrible 'fishy' smell. I was confused, nice girls don't smell, right? Especially when it's a romantic outing... (Later, inside '*Intimate Health Formula*' I'll reveal what you could do to naturally stop this embarrassment -- without any chemicals or side-effects).

No doubt, I had to stop him from loving me in a specific way... sex was painful and he was visibly unhappy.

Then to my horror, next I found a very horrid discharge, like porridge, lumpy, running down my legs. Am I going to die? I grew tensed, my heart was beating faster, what is happening inside me?

I would endlessly change clothes and wash myself every hour, but nothing I did would keep the bad odor away. Holidays were completely ruined.

It was 'Chlamydia'.

I began losing sleep over so many questions... **did he cheat on me?** How do I tell him that I have a STI (Sexually Transmitted Infection)? **What if he thinks I cheated on him?**

It was time to pay the dues.

Given my medical background, I decided to proceed with natural ingredients that you ordinarily read about. I avoided fast foods, took commonly suggested foods like honey, lemon juice, etc. and I used every "comprehensive" trick from the magazines.

But my ordeal didn't end... excruciating abdominal pains, itching, burning, unbearable pain, sometimes blood in the urine made me reluctantly rush to a clinic.

Slowly my energy, cheerfulness and confidence evaporated. From a 'popular girl', I became a 'sick girl.'

Suddenly I began avoiding all my friends and going out because I would feel that I don't have the energy and I was concerned about the smell.

I just wanted to eat and sleep. I was gaining weight and losing strength... and I was losing the love of a good life.

And the worst of all?

My boyfriend noticed the weird changes...

One night he noticed the discharge and said, "*What's that?*" **He just stopped touching me...** he froze, a cold night in hell.

I became self-conscious... I wouldn't allow him to cuddle me... because I thought he might smell it... **I stopped going out**, I avoided friends, parties, dinners, movies, even the gym because I was terrified others may notice the dirty odor.

Once I overheard a hot guy whispering to his friends, “**smells like a fish-factory there...**”

I was mortified, disgusted, sitting there I clamped my legs together with all my might and wished the fishy smell wouldn't leak out anymore. Oh god, what have I done wrong? Why me?

No surprise, it took a toll on our intimate relationship, we stopped having fun! He was going away, and I just watched -- no, make that, witnessed -- yes, I just **witnessed** we were breaking apart.

He wouldn't look me in the eyes, and I was confused, embarrassed, ashamed and annoyed -- when will this infection STOP?

It didn't...

My boyfriend did... he kicked me to the curb for someone else!

I couldn't believe it...

I loved him so much, he was my first boyfriend...

Alone I cried for days.

But still those horrible bugs were eating me inside out.

I grew determined... no matter what happened... “I will NOT GIVE UP.” Even though I hated medicines, and some people suggested to avoid them, I gobbled down antibiotics and drugs by dozens... in a do or die mode.

Guess what happened next? There is only one way to go: DOWN.

My immunity nosedived... my vaginal flora was destroyed.

...bad, BAD, **BAD** idea. **As if one was not enough I got one more infection!**

Candida overgrowth.

It is a yeast, and it is a beast.

Gosh, I mishandled everything.

Then something even more horrible happened...

I was constantly sick, I was always tired, sleepy, a brain fog so severe that my employer fired me!

Without a job, soon I had hardly anything left in my bank account. I had drained all my savings.

BUT...

NONE. OF. THE. SOLUTIONS. I TRIED. WORKED.

Some stuff kind of helped, but I made no really meaningful breakthroughs.

With 110 dollars and 99 cents left in my bank account...

I felt like a prisoner in my own body. I hit rock bottom. Each day I felt more terrible and more lost and more sick...

My family and friends thought I'm hypochondriac, something is seriously wrong with me,

They thought,

"It's all in your head"

"Why are you TIRED all the time?"

"There is no such thing as candida, you're just faking it"

After suffering for almost a decade, I was thinking...

"Maybe that's my destiny"

"Give up, there's no solution... I'm not going to get rid of it"

"It's a bane of my existence, accept it"

My life was spiraling down towards uglier, darker and more depressing worlds. And again I just witnessed it happening.

**But just before I was about to give up I had a strange realization that
... changed my life...**

I met a god-send man, a Yoga instructor, and he gave me his unique Ancient outlook and joined the dots for me. I had an epiphany.

And **suddenly in a flash, my horrible life **turned around****

I WAS COMPLETELY

CURED

WITHIN A FEW DAYS,

NO SIDE-EFFECTS, NOTHING

ALL THE SYMPTOMS GONE... LIKE THEY NEVER EXISTED, FINALLY THE CHILLING WINTERS WERE OVER!

My skin got smoother, my excitement was through the roof, and I felt lively and sexy again.

I wanted to go out and play and enjoy this gift of life... I was more energetic and happier than I ever was. My family was surprised.

I felt like it was Christmas again... but this time it was almost a decade late!

But... just to be sure I took the lab tests and the results were clear... My doctor was surprised because she had seen me suffering for five years now, *"You have no signs of any infection, everything is normal and good."* Hearing those words brought tears of happiness to my eyes and I felt like I had been given a second chance to live my life.

No Candida, Chlamydia or any other Vaginal infection,

No fishy odor, I can sit any which way I like,

I can command him to go down and enjoy me in whatever way he liked,

No discharge... not a teeny-weeny scary drop,

No pain, no muscle or joint ache,

No tiredness or sleepiness in the morning...

No brain fog, everything crystal clear

I was fresh, and full of energy, I joined the gym again, and I went back to college to become a successful Certified Nutritionist (which I sure did).

The man who helped me in all this, fell in love with me, and complimented me, *“I get ultra horny by your natural aroma...”*

Then one day he went down on his knees, took out a diamond ring out of his pocket and said, “Will you marry me, Mia?” I had tears rolling down my cheeks...

And it was because I could...

.... CRACK THE CODE TO ‘FLUSH’ OUT BUGS FROM MY SYSTEM!

Now comes the most crucial question: what exactly do you need to do to erase the vaginal infections?

Well the answer lies at the end of my story... But right now I'll tell you the best Vaginal Infection Treatment... Hang on because it might surprise you,

I realized the best vaginal infection treatment is –

NO Vaginal Infection Treatment!!

This may look counter-intuitive, I understand. But you'll naturally realize it in a moment that really this is the best treatment plan for any vaginal infection.

Why? Shouldn't you take those drugs, or antibiotics?

I'm not suggesting you stop taking them, but the thing is they really don't heal the problem. In fact, they may aggravate these infections into life-long problems!

Vaginal Infections like yeast, BV, and UTIs typically start with a dose of antibiotics, and they are proven to leave you in a mess. I'll reveal it why in a moment.

Right now I'll reveal 3 triggers that feed these bugs inside your body and turn them into raging monsters...

Trigger #1: Drugs, Antibiotics, Antifungals Pills or Creams

Could your doctor's advice be harmful to YOUR health?

Visiting your doctor at the first sign of a problem should be a good thing. Right? After all, every day 177,000 Americans do it.

Unfortunately, in some cases, this could be THE worst mistake you make.

Few people know this, but even the drugs that are widely considered as "safe" can be dangerous.

Here's why...

It's because the **drugs like antibiotics, antifungals and creams are not effective.**

Almost 4 out of 5 Americans are prescribed an antibiotic each year. But it is a huge mistake... here's the proof.

source: CDC

Dr. Tom Frieden, MD, MPH, Director, U.S. Centers for Disease Control and Prevention documents in his report, *Antibiotic resistance threats in the United States, 2013*,

"healthcare providers are **forced to use** antibiotics that may be more toxic to the patient and frequently more expensive and less effective. **Even when alternative treatments exist...**"

Yes, you read that right, at last, on April 23, 2013, Dr. Tom Frieden, Director CDC publicly admitted, "**alternative treatments exist...**" And they are **more effective and less expensive.**

Here's the scary part, he further warned, "*Candida*, a fungus... is showing increasing resistance to the drugs."

Another question is, "Who is forcing doctors to use antibiotics and antifungals?" I will tell about this scandal in a moment.

But the fact is: Drugs can't handle these bad boys... because drugs just cover-up the symptoms. With drugs you think you hold all the aces but you are just fighting a rearguard action.

Bad bugs return with raging anger, and severe intensity... and then the infections come back regularly, ruining your life, changing your personality, frustrating you, until you give up.

Without a clue, your doctor increases the dose, which severely devastates your health and inner balance. And again they return with more intensity. Does it make sense?

Bottom line: Stop drugs now and take decisive action.

But there is an irony in all of this as Dr. Tom Frieden, also noticed, "up to 50% of all antibiotics prescribed for people are **not needed** or not optimally effective."

A study, described in *The Journal of the American Medical Association*, found that women who took antibiotics for 500 days over a period of 17 years, had twice the risk of breast cancer as those who took none. Even women taking just one had increased the risk by 1.5 times!

That's just the tip of the iceberg.

Because drugs devastate your natural inner balance!

As you may know, your vagina and gut (and really your whole body), contains different types of healthy bacteria. And researchers at the University of Maryland found that different women can host different microorganisms.

The good microorganisms, I call them 'little friends', identify bad bugs and kill them, protect us from harmful chemicals and radicals, boost immunity, and heal inflammation and do much more than we could handle ourselves.

But antibiotics create mayhem everywhere. Dr. Mark Sircus writes, "It's like a series of bombs tossed into a market square." And it kills a lot of 'little friends' in your body.

A recent study found that just one course of a common antibiotic devastates your gut flora for an entire year.

What's worse? When those good friends are gone, the party is open to gatecrashers with no bouncers around... vulnerable, many women unknowingly get a yeast infection.

Because alone your immune system is fighting on one battle front, and you can get the infection on other body parts like your vagina.

Whether it's UTI (Urinary Tract Infection), Bacterial Vaginosis, Chlamydia, or Trichomoniasis or Yeast infection, all these bugs are highly opportunistic. You give them one opportunity and they will strike back!

My own Chlamydia was a result of taking pregnancy prevention pills as they screwed up my inner balance. And then after taking the antibiotics, I got a yeast infection!

What's shocking is: "In US alone, obstetricians and gynecologists write 2,645,000 antibiotic prescriptions every week. Internists prescribe 1,416,000 per week. This works out to **211,172,000 prescriptions annually**. Then pediatricians prescribe over \$500 million worth of antibiotics annually just for one condition, ear infections."

You can imagine it's too hard to quantify the total abuse because antibiotics are prescribed for almost everything:

- Flu
- Sinus infections
- Coughs
- Sore throats
- Ear infections
- Stomach flu
- Bronchitis
- And many more conditions

Dr. Lisa Landymore-Lim wrote in her book, *Poisonous Prescriptions*, "Antibiotics cause asthma and diabetes."

The CDC estimates that roughly 30% of Candida patients with a bloodstream infection die during hospitalization. The cost for 3-13 days of additional hospitalization could be \$6,000-\$29,000 each year.

Dr. Chris Woolams writes, "It is estimated that 70% of the British population have a yeast infection. The primary cause of this is our love of antibiotics..."

Moreover, every year, there are more than 140,000 emergency department visits for reactions due to antibiotics in US alone. And almost 79% of these are due to an allergic reaction.

Can you imagine how deep this rabbit hole goes?

Why? Why are so many resources wasted on drugs? Why was Dr. Tom Frieden concerned about doctors being forced to use antibiotics?

Nobody will tell you this, but I will reveal it to you...

Well, it's all because of the **GREED**.

Greed for money.

Because 'Big Pharma' wants BIG profits.

If they can skin you alive for profits, then they will. The formula is simple, "don't lose the customer"!

If you get rid of the problem, how will they make money off of you?

With Western medicine, a patch is placed over one ailment, which causes a slew of other ailments that lead to more drugs, which leads to more ailments, which lead to more drugs, more ailments, more drugs...

It's a mess for us but nice profit for the pharma industry.

The best way to take your revenge is by taking your health matters into your own hands... and get well permanently... before I tell you that, let us see the second trigger that is feeding those bad bugs.

Trigger #2: Certain Kinds of Foods

It's a well-known fact that the standard American lifestyle provokes bad bugs more than anything else.

It feeds them, makes them so strong that our 'little friends' and immunity together is not able to overcome them.

Eating sugar is like injecting steroids into these bugs and turning them into raging monsters.

Common foods like candy, ice cream, cookies, cake, pie -- anything loaded with sugar -- acts as a fertilizer. Carb-heavy foods, like bread, converts to sugar easily, and bugs love such food items.

Bugs demand more sugar and more carbs, and send sugar-cravings.

They make you hate those things that could be fatal to them!

Like some delicious simple foods and spices that are probably lying, right now, in your kitchen, or you can add to your cart at low-cost in any grocery store, that take 4 important actions on them:

a) Eliminate bugs;

Some food items are poisonous to pathogens, or they make them weak to help you eliminate them from your body.

b) Restore immunity;

They provide you the inner strength to fight off the pathogens and keep you -- infection free forever.

c) Beef up 'good guys' inside;

These food items provide natural strength to your friendly microorganisms, multiplying your capacity to get rid of the 'bad boys.'

d) And lastly, help maintain your inner balance.

This means that even if you come in contact with those bugs your inner 'balance' ensures they just pass through your body, without sticking anywhere.

Now this could be new information to many doctors, simply because doctors are not trained in such discipline. Nor do they have the time to look at the latest research. But the fact is, natural treatment plans work and are highly cost-effective compared to our conventional medicines.

Later I'll reveal more about some food items and I'll give you complete access to the full information, but before that let's talk about the most important 3rd trigger for vaginal infections.

Trigger #3: Low immunity

Usually, our bodies are self-sufficient bug killing machines. Our immunity and 'little friends' locate, pursue and demolish bad agents and bugs on its own.

But what if we kill our own little friends in our body (with antibiotics)?

Or, for some reason our own immunity goes down or it is fighting on another front? Like if our immunity is fighting with sinus or cold bugs?

When we are sick or vulnerable we are out in the open like inviting flesh for predators.

Bugs like yeast, bacteria, parasites are highly opportunistic, and attack at the slightest opportunity.

And when they find the body part (i.e. your vagina) that has lost its natural balance, and the bouncers are few, then these pathogens party it up.

If fact, some bacteria like Chlamydia can stay low for years, only to appear when you least expect it. BV can sometimes happen when 'good guys' overgrow unchecked. And **in the right conditions, Candida yeast can grow in twice the quantity in 30 minutes!**

So you have to keep everything in balance, and '*Intimate Health Formula*' is designed to give you that natural balance.

To keep the balance and immunity you must keep these three things in mind,

1. Avoid some food items that hamper your immunity and the balance down there. Harvard Medical School warns that a poor diet weakens your immune system,
2. Stop using commercial douching products, scented creams, and ineffective and potentially dangerous tricks because these things screw up the balance,
3. Probiotics are NOT enough, it's like throwing a water bucket on a blazing hell wild-fire. It's a full blown war down there, and the body's immunity is losing it each hour... but you need to know certain key things and protocols that maximize the efficiency of probiotics,
4. Taking Immunity boosting pills could be the worst thing you take,

You know, the Big Pharma has only one answer to immunity – boost it.

But the fact is billions of cells work in harmony to keep you healthy and blindly dumping in more cells can screw up this balance. Even Harvard Medical School warned that blindly boosting immunity makes no sense.

So you will later discover in the '*Intimate Health Formula*' that you need to work on the easy inner balance and strengthen your immunity via natural ways by maintaining the holistic balance.

Hang on, because right now I'll reveal exactly how to stop the malodor, end the discharge and get rid of your infection once and for all

Now we have seen that conventional methods don't treat your problem but simply mask the symptoms for a little while.

So today you'll get the final solution, a secret method to end the infection by flushing the bugs out of your body – once and for all!

You must be wondering, does the solution work?

And as I've mentioned, as soon as I figured out this secret my entire life changed.

Some women in an old forum noticed my success and wanted to know my secret...

And so...

I began sharing what I discovered with a few ladies who had decade long infection stories...

And lo and behold, my techniques worked!!!

Check out the comments I got after I shared my secrets with them...

"Initially I was suspicious, have tried many things before without any results but I was desperate to try anything so I tried it like half of it and... it worked!!!! My decade old infection is finally gone... just vanished. My energy levels have skyrocketed, my skin has become smoother and I'm feeling awesome..." x

"WOW girl, where did you get all this information... Why isn't my doctor aware of this? I just solved my five-year-old problem!!! Thanks Mia, xoxo"

Once I started getting success stories like these I knew there must be more women out there that I could help...

So I began sharing my advice with even more women -- I went out and began sharing my advice through lots of different mediums: books, articles, seminars... you name it...

And I guess the word got out, because since then I've taught my secrets to over 38,000 women from 75 nations, and this is an unusual feat for an unusual girl like me.

And all the time I get messages from women (and their husbands) all over the world telling me how I have helped them reach a good taste down there and save their relationships.

And I even get messages from women who have turned around their careers and businesses because the treatment freed up their energy that those bugs were sucking away.

And I want you to get my secrets too...

What I did was, I penned down the complete program called '*Intimate Health Formula*' in 121 pages, and you can access it all within 30 seconds,

Because '*Intimate Health Formula*' is a downloadable guide so you don't have to wait for anything to arrive at your home or office.

That means in the next few hours you could have tremendous relief from the symptoms without lifting a finger!

And you will be date ready. Or, ready to play with your kids or grandkids without limitations.

Moreover, you get complete privacy because the fact is a vaginal infection is embarrassing. You don't want your neighbors, friends or boss to try to find out, what the yeast infection, BV, Clam or Trichy is?

In '*Intimate Health Formula*', you'll discover, step-by-step, exactly how to end four vaginal infections -- permanently... from the privacy of your home...

...without any side-effects or any expensive ongoing treatments.

Inside you get exactly how to end all kinds of infections and finally flush out alien bacteria, yeast, or parasites from your body.

Even if right now you are facing the worst kind of outgrowth, rashes, body ache, digestive problems, bloating... it immediately gets on work to bring you relief from your symptoms and gives you a plan to stop it forever.

Now here's a sample of what you get in '*Intimate Odor Formula*'...

The key to treat a vaginal infection is to get the right diagnosis!

You may be surprised to know that most of the time, lab tests and doctors fail to get the right diagnosis.

I had to go through 3 expensive tests before my Chlamydia was identified!

You can imagine the frustration and stress women go through when they discover the diagnosis was wrong, and they were taking the wrong medication which did a tremendous amount of damage.

But you can avoid all that... imagine concluding with confidence that you have got this exact infection, and sitting in your doctor's office, you say, "I've this infection, please confirm it with this specific test, and not the other ones..." And notice I am not suggesting you to ignore medications, they sure have their place but you need to know when exactly should you take them...

... and inside the '*Intimate Health Formula*' you'll discover when should you go to your doctor and seek a doctor's advice... but for most women the natural plan inside this guide is enough to get rid of these bugs.

So in Chapter 3 of your '*Intimate Health Formula*' guide, you get the simple step-by-step techniques and a few questionnaires to pin point the exact problem.

In fact, on page 62 you'll see a simple 15-minute test, you can do right now and you really don't need anything else but a glass of water like this:

This information alone can literally save you tremendous frustration and more than \$150 in various unnecessary tests.

In Chapter 2, page 36, you discover the truth about musky odor and discharge.

Finally, today, once you discover why the aroma of your intimate parts change and why it feels a certain way, you will realize the exact problem and the best way to combat it.

In Chapter 6, you get the 100% natural holistic Vaginal Odor Formula TM. This simple 5-Steps protocol is designed to eliminate the root cause of the vaginal infection.

On page 88, you get the step-by-step easy all-natural plan designed to get rid of Candida (Yeast Infection), Parasites (Trichomoniasis), and Bacteria (BV, Chlamydia).

On page 100 you get simple but critical ways to bring and maintain an inner balance in your body.

Many people don't know this but there are several types of stress and they all damage your body and immunity.

But inside your guide you get the exact 5 techniques you can do right now, whether you're in your home, office, travelling or picking up your kids from school...

On page 103, you'll get 5 techniques to drop the stress levels like a ball and SKYROCKET your energy levels to jump through your life from dusk to dawn.

Doctors say reduce your stress, but they don't tell why and HOW. But inside your guide you get FIVE simple techniques to reduce the stress without you lifting a finger.

And technique#3 is so simple that you'll kick yourself for not trying it earlier. Technique #5 is so easy that you can do it the whole day and feel wonderful and boost your youth and vitality to new undiscovered levels.

On page 73, you'll see step 1 of the '5-Steps to Eliminate Root Cause of Infection'. You'll get exactly what foods should you avoid because they are either a source of bacteria, parasites, yeasts or they feed them or they destroy the natural pH balance of your vagina (and body).

On page 80, you'll get a wide variety of delicious food items that you can add to your daily diet and you'll have a wide-choice of enjoying many mouth-watering food items.

For example, you get:

1) One local spice that packs a deadly punch and unleashes bug-killing activity on almost all strains of bad bacteria, parasites, virus, and candida yeast.

And best of all, you can use this spice immediately and remove the malodor starting this very moment, without any side-effects like nausea, itching, hair loss and seizures.

2) Next food is a tree oil, your secret-weapon to fighting yeast and bad bacteria into submission.

This oil instantly attacks like a sword-wielding ninja and kill those bugs by rupturing their membranes.

This \$5 food oil is a highly cost effective way to fight off these infections. In fact, *Journal of Chemical and Pharmaceutical Research*, hailed this food oil as "safe drug."

But the medical establishment will not tell you about such simple and natural treatment plans, because really they can't make a big profit with a low-cost \$5 item. They'll rather have you go through \$500 tests and pills and chemicals that destroys your inner beauty.

3) Here's something more, you may have heard that you should not take fruits if you have the infection.

But there are certain delicious mouth-watering fruits you must take, to boost your immunity and fight off infections without any side-effects.

Now it could be new information to many doctors, simply because doctors are not trained in such discipline. Nor do they have the time to look at the latest research. But the fact is, natural treatment plans work and are highly cost-effective, more than our conventional medicines.

On page 65, you get a complete 12-hour Relief formula designed to eliminate the horrible 'fishy smell' ASAP.

On page 83 you get a proven 3-day formula to clean your body of a large number of bacteria, parasites, and yeast in one fell swoop.

You also get a simple technique to sweep out heavy metals from your body. These substances could be toxic, suck your energy and make you sick. And within 30 seconds in *'Intimate Health Formula'* you get it ALL and much more simple techniques to arm you.

How much all these lifetime Infection-FREE benefits really worth to you?

Means if I find a breakthrough study that could be important for you and your health or your family's health, or I prepare a special health report, or a bonus for my new members, or add something to my program, then you'll be given the first access to ALL of it.

But there will be -- NO stupid monthly renewals, NO nonsense yearly account maintenance charge -- for YOU. Basically you pay nothing for any future update, special report, or bonus from me. Today, you lock-in everything for FREE.

I am not sure how long will I keep this option up but I urge you to steal the offer now because tomorrow the terms may change and I may charge new members a small fee for this service. If the terms change, unfortunately I might not be able to reverse them for you.
